PROFESSIONAL SUMMARY

Quantitative Portfolio Strategist and MBA candidate (Strategic Financial Management in association with EY) with a technical foundation from Nasdaq R&D. Proven track record managing a ₹6.5-6.9 Cr AUM mandate for HNI and SME clients, achieving a 100% retention rate. Expert in engineering institutional-grade alpha through Python-driven factor models, DCF valuations, and systematic hedging overlays that consistently reduce drawdowns. Specialized in bridging the gap between software architecture and capital market strategy to drive superior risk-adjusted returns.

CORE COMPETENCIES

Portfolio Management | Equity Research | Valuation (DCF/LBO) | M&A Analysis | Financial Modeling | Risk Management | Data Visualization (Power BI/DAX) | Python (Quantitative Analysis) | Asset Allocation

PROFESSIONAL EXPERIENCE

Independent Portfolio Manager (VST Capital)

Multi-Asset Strategy | Private Wealth

July 2022 to Present

- Managed ₹6.5-6.9 crore AUM for 5+ HNI & SME clients with consistent performance and 100% retention.
- Architected multi-asset strategies across equities, fixed income, and alternatives to optimize risk-adjusted return.
- Enhanced Sharpe ratios by 15-20% via factor-based diversification and systematic asset allocation.
- Deployed "Quant-First" frameworks using Python-driven regression and multi-factor models for security selection.
- Built Python/Excel dashboards for real-time performance attribution, risk contribution, and drawdown analysis.
- Engineered hedging overlays that mitigated portfolio drawdowns by 20-30% during high-volatility regimes.

Finlatics

Capital Markets Associate - Internship

Aug 2025 to Oct 2025

- Generated high-conviction equity ideas by synthesizing momentum strategies, technical indicators, and price action analysis.
- Engineered and stress-tested derivative strategies using Option Greeks and payoff modeling to optimize risk-return profiles.
- Built institutional-grade integrated DCF models featuring multi-stage forecasting, scenario analysis, and sensitivity testing.
- Stress-tested multi-asset portfolios across diverse macroeconomic regimes to evaluate performance resilience.

Nasdaq

R&D Software Engineer- Capital Market

Mumbai
May 2022 to Aug 2023

- Engineered trading and risk architectures for multi-asset operations across Equities, Commodities, IRD, CRD, and FX.
- Designed and implemented a new FX trading feature, improving execution efficiency and overall system performance.
- Developed Calypso modules for pricing, valuation, PnL, and risk reporting in collaboration with front-office teams.
- Reduced release cycle time by 15%, enabling faster rollout of trading and risk enhancements in response to market movements.

LEADERSHIP EXPERIENCE

U&I (NGO)

Event Management, Fundraising Manager, Teaching

May 2019 to Jun 2025

- Directed fundraising and event operations, managing 50+ volunteers and high-impact resource mobilization initiatives.
- Spearheaded academic and skill-training programs, optimizing volunteer coordination to deliver measurable educational outcomes.

STRATEGIC FINANCIAL PROJECTS

Kotak Mahindra Bank Robotic Process Automation (RPA) Project

Jan 2026 to April 2026

- Identified operational inefficiencies and architected scalable automation frameworks, projecting 30-80% cost savings (~₹5.7 Cr+).
- Developed a rigorous ROI model with a 3-6 month payback period to justify capital expenditure and operational scalability.

Quantitative Equity Analysis (Python Project)

Nov 2025

- Developed multivariate regression and volatility frameworks to analyze FAANG+ stock dynamics and risk-return profiles.
- Benchmarked Apple against peer-set tech giants using statistical trend analysis and relative valuation methods.
- Deciphered return patterns and risk dynamics across diverse market cycles to identify high-alpha investment opportunities.

Power BI Capex Governance Dashboard

April 2026

- Engineered a Capex Governance Dashboard providing real-time visibility into a ₹130M portfolio with 25.4% capital utilization.
- Forecasted ₹32M in annual benefits by optimizing key operational metrics, including downtime and scrap rates.

INVESTMENT BANKING & VALUATION TRACK

J.P. Morgan Investment Banking Virtual Internship

M&A Analyst

Sep 2025

- Built institutional-grade DCF models incorporating WACC, FCFF, and CAPM with rigorous scenario and sensitivity testing.
- Executed strategic target screening by evaluating financial health, market positioning, and cross-sector synergies.
- Authored high-impact investment memos detailing valuation outcomes, strategic rationales, and execution roadmaps.

Executed multiple projects across finance, analytics & automation domains

Aug 2025 to Present

EDUCATION

UPES

Jul 2025 to May 2027

MBA in Strategic Financial Management (EY Collaboration)

85.2% (sam1)
